

Spring is coming! Make plans for your new "custom home?"

Making Ideas Reality

The phrase "custom home" can mean many different things in the field of today's new home construction. Here is how Skaggs Builders defines what a custom home is.

1. Every family is unique and the home they build should parallel their needs to create comfortable and enjoyable living with a floor plan that makes this possible.
2. Each building site is different. We will work with the customer and create a site plan specifically for their home on their land/lot.
3. Style - Each customer has their own style, their home should reflect who they are. We work with you to create the style of home you want on both the exterior and interior. We make your ideas reality.
4. The process of building a custom home should flow smoothly. Skaggs Builders has been building homes for 40 years and developed a process that makes it easy to go through. The average home takes 4 months to build.

Our custom homes vary from the comfortable two bedroom home because the kids are gone and it's time to downsize to the large home for the growing family. The size of a home doesn't determine if it is custom or not. It's defined by fulfilling the needs of our customers. Our prices are always competitive and our quality is the finest. We will do our very best to get the home you want in your budget. If you are thinking about building consider us and let us give you our best.
